(6) ScotchLocks

TOOLS REQUIRED

10mm Socket
Phillips Screwdriver
Panel Removal Tool

SKU # J141993

STEP 1

Remove (6) 10mm bolts and (2) push clips from the fender liner. Unplug the parking light connector. Firmly pull fender flare away from vehicle.

STEP 2

Begin assembling the new fender flare by inserting (4) Small U-Clips into the fender flare.

STEP 3

Install the turn signal lens into the fender flare using (4) Small Phillips Screws.

STEP 4

Install the marker light lens to the turn signal housing using (1) Large Phillips Screw. The lens gets inserted through the front of the fender flare. Plug in the marker light harness into the turn signal wiring harness.

STEP 5

Install the Turn Signal Support Bracket to the fender flare using (3) Large Phillips Screws.

STEP 6

Install (8) Fender Clip Pads onto (8) Fender Clips, then slide them into the fender flare.

STEP 7

Install (3) M6 U-Clips into the Turn Signal Support Bracket. Fold the flap down, the secure with (3) M6 Phillips Screws.

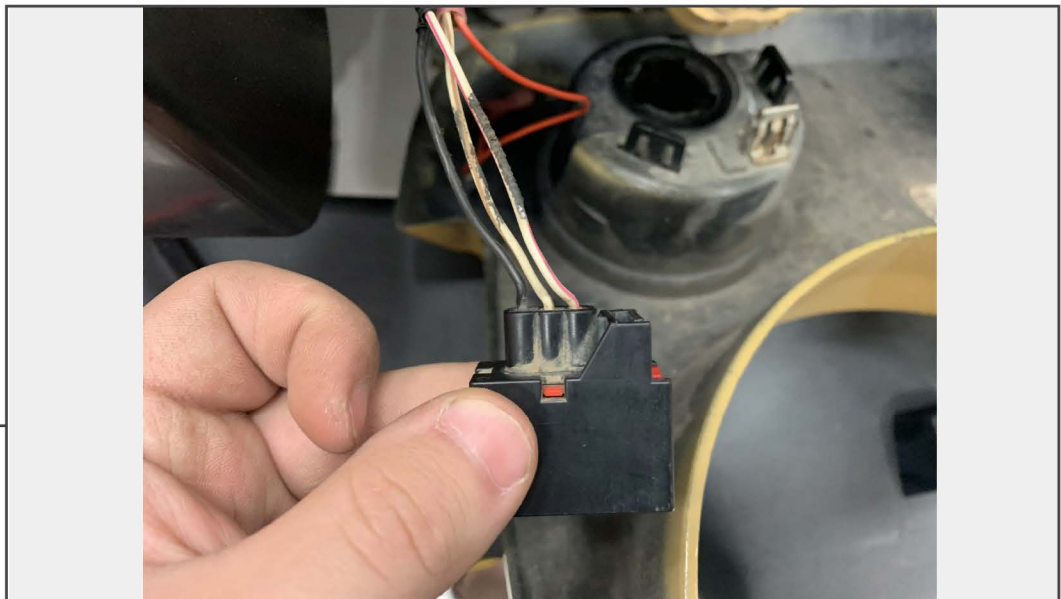

STEP 8

Reinstall Fender Flare onto vehicle following step 1 in reverse order.

Note: To reuse factory inner fender liners, modification will be required.

**STEP 9
(WIRING)**

Remove grille from the vehicle by removing (6) push clips along the top. Firmly pull the grille away from the vehicle. Unplug the turn signal wiring harness from the light socket.

**STEP 10
(WIRING)**

Using provided ScotchLocks, tap into the following wires for light functionality. Repeat installation on opposite side. Installation is now complete.

Turn Signal Harness	-	Vehicle Turn Signal Harness
White/Pink	-	Green
White/Brown	-	Brown
Black	-	Black
