# REPLACEMENT DOOR HINGE SET - BODY SIDE

(2007-2018 WRANGLER JK)

---

## INSTALLATION INSTRUCTIONS

### CONTENTS

---

- (2) LH Upper Hinges
- (2) LH Lower Hinges
- (2) RH Upper Hinges
- (2) RH Lower Hinges

### TOOLS REQUIRED

---

- 13mm Socket
- Ratchet

SKU # J166664

**STEP 1**

Remove the door from the vehicle following the OEM removal process. With the door removed, remove (3) 13mm bolts from the upper hinge, and (2) 13mm bolts from the lower hinge.

Note: Hardware will be reused.

**STEP 2**

Using the unpainted surface on the vehicle as a template, install the new hinges to the vehicle using the original hardware. Tighten the bolts enough to re-install the door to test fit alignment.

Re-install the vehicle door and slowly close the door, and adjust the hinges as necessary for best fit.

**STEP 3**

Once the door is properly fitted, fully secure the mounting bolts.

Repeat steps 1-3 to the remaining door hinges. Installation is now complete.
