## STEP 1

Clean the vehicle door sill using an alcohol prep pad, and allow the panel to fully dry. Align the entry guard to the vehicle door sill prior to removing the double sided tape backing.

## STEP 2

Once familiar with the panel fitment on the vehicle, peel the red tape backing from the double sided tape. Firmly press the panel to the vehicle to ensure proper adhesion.

Repeat steps 1-2 to the remaining entry guard. Installation is now complete.
