

REPLACEMENT DOOR SKINS

(1987-1995 WRANGLER YJ)

INSTALLATION INSTRUCTIONS

CONTENTS

(1) Door Skin

TOOLS REQUIRED

Plastic Pry Bar (Optional)

SKU # J180712 / J180713 / J180714

STEP 1

Remove the vehicle door frame from the original door skin.

Note: The door skin will be a tight fit. It is recommended to place the door skin in the sun prior to installation to allow material flexibility. Light prying with a plastic pry tool may be necessary.

Undo the Velcro around the sides of the new door skin. Place the door frame into the new door skin starting with the lower corners. Then, form the upper corners around the door frame.

STEP 2

Installation is now complete.
